Lot 1 covers the supply of cleaning machines for commercial and professional use in institutions, including the provision of training and product support, along with associated accessories, parts and consumables. Lots 2-12 cover regional provision of cleaning equipment maintenance and servicing either on a regular, pre-planned basis or, on a reactive, ad hoc repair basis as required by Member Institutions.

Benefits of the agreement include:

- Savings are generated by harnessing the buying power of all the participating consortia Members.
- A multi Supplier Framework Agreement will ensure that Suppliers remain competitive through the life of the Framework Agreement; and
- Members have an OJEU compliant route to the market.
- The Framework Agreement saves the member time and resource through reducing the process to contract with the supplier. Members can Call-Off from the Framework Agreement through Direct Award or Further Competition saving considerable resources and thus providing savings to Members in terms of tendering costs.
- Consistent terms and conditions, including the provision of an SLA for use at further competition
- NWUPC will be the Contract Manager for the Framework providing support to institutions and updates on market intelligence.

Thanks to the Tender Working Party Members for their time, invaluable knowledge and support.
